

Water

Designated sampling sites are part of the Federal Government and many state' government requirements via the Safe Drinking Water Act ("SDWA").

In support to aid and assist in detecting and prevent contamination of the nation's water supplies, Max Fusion, Inc., a diversity supplier, manufactures The MX Water Sampling Station. . Protect drinking water, with our proven product which has been in use since 1966, from any of a long list of contaminants, i.e. Califon.

Our water sampling stations provide a designated sampling point on public right-of-way.

Enquire about our completely **stainless steel station**. Visit <http://www.steelsourceco.com>
